

Dr. Clarice Barrett, Msc. D My Conclusions: On How the Universe Works and the Effects on Mankind, After 45 Years into Astrology

"Zodiac" literally means: "the path to life"

**It is the Gospel Written in Symbolic, Pictorial Language,
Manifesting the Path to Eternal Life.**

Dr. Clarice is an existentialist, astrophysics, and astrologer, (Bringing You Knowledge :) this topic is very vast, but I have shortened it for you to get point, Thanks. [The Truth on Your Existence on Earth](#) and Some Will be Upset with this report, to Learn They Aren't as Free as They Think they Are With Their Lives!

Understanding the 3rd dimension in its operations: and how it relates, and controls everything on this planet. "Simulation a Matrices" This is what even the Criminal Law found out in Forensic Science of the Universe, Planets, Energy, Vibrational Sounds and the Center Clock to this Universe, which all are connected to Earth. They learned that history repeats itself also every 26,000 years. In fact it is 25,980 years, rounded off to 26,000 in reports. Everything is programmed, the Third Dimension, our Universe, Planet Solar System, Earth, Humanity, Animals, and The Functions of Earth and Planets.

Now, there's no evidence to suggest that the real state of the planet is total darkness and is dominated by power hungry computers. But there is a good amount of evidence to suggest that we are actually living in a programmed simulation right now.

One's first reaction might be: "This can't be a simulation—it all feels so real!" But that's all part of the theory. If we are in a simulation, the simulation would be *so* good that we wouldn't be able to know for certain that it's all just a computer program. But, we can pick out signs present in our daily lives that support of this theory. It all sounds pretty unlikely, but let's look at the strongest signs to date.

Have you ever wondered why the same numbers just kept on showing up in your math and science classes? Pi, the speed of light, Planck's constant, all the season change reputedly each year, day and night, polar opposites on everything, the gravitational constant—the list goes on. The fact that we continue to see the same numbers and equations governing how objects move around points to the conclusion that our universe may actually be a computer program.

This is a bit of a circular argument. We can't know for sure whether math equations run the universe because we're in a simulation, or because that's how the universe actually works. Does energy always equal mass times the speed of light squared ($E = MC^2$) because someone designed it that way, or because that's just how things worked out? "Yes". The Creator designed it that way. Later I will explain.

And there are other reasons to think we might be virtual simulation. For instance, the more we learn about the universe, the more it appears to be based on mathematical laws. Perhaps that is not a given, but a function of the nature of the universe we are living in. "If I were a character in a computer game, I would also discover eventually that the rules seemed completely rigid and mathematical," said Max Tegmark, a cosmologist at the Massachusetts Institute of Technology (MIT). "That just reflects the computer code in which it was written."

Furthermore, ideas from information theory keep showing up in physics. "In my research I found this very strange thing," said James Gates, a theoretical physicist at the University of Maryland. "I was driven to error-correcting codes—they're what make browsers work. So why were they in the equations I was studying about quarks and electrons and super symmetry? This brought me to the stark realization that I could no longer say people like Max are crazy."

Is The Universe A Computer Simulation?

We've heard from a number of scientists and thought leaders, including Elon Musk; it's likely we're living in a computer-simulated reality. Musk said he believes there's a one-in-billions chance we're living in "base reality," or a non-simulated, completely organic existence.

It's also becoming more apparent that mathematics is the language of nature — a universal dialectical that can be used to describe everything, from the inconceivably large to the infinitesimally small. As we continue to acquire more insight on this reality it appears we may be living in what appears to be a physical construct that might actually be generated from code.

The concept of a computer-generated reality would require a creator or engineer behind the simulation, similar to what us mortals might call a god – but isn't that essentially describing the same thing, just explained by the language of two different world views?

In fact, the simulation argument is perhaps the first interesting argument for the existence of a creator in 2,000 years.” The comment comes from David Pearce, a thought leader in the decreasingly conceptual and increasingly applied realm of transhumanism, a field of technology epitomizing the desire to hack our existence. But you cannot not hack the Third Dimension, we cannot leave it, nor can anything enter it.

For many this leads to ethical questions of “playing god” and messing with nature. But could transhumanism prove to be an inevitable next step for us? Wow! I hope not. I don’t believe God will allow man to continue in this creation.

The Body:

You take our bodies for example, we have 139 hormones that control our bodies, and it is programmed to even heal its self. We are programmed to go to sleep and to be awake so many hours a day. Our bodies are programmed even on medicines, when they will take effect. Even if you die, they know how long due to the fact, of the hormones that are release and temperature. We are programmed to even eat 3 times a day. This how they know in producing medicines on their effects.

Earth:

Earth is programmed to take care of itself. The weather is programmed, the seasons are programmed. With wind, fire, earth and water. All the eatable things are programmed, oranges, lemons and etc. All plants. All animals in their seasons.

The Human Mind:

People think they are in control of their thoughts and actions. “NO!” that is controlled through the Moon, and all the planets. This is why the moon, planets changes zodiac signs daily and monthly, including yearly and ages. It is even programmed in the responses you make, good or bad. This is your only Freedom you have in this program, is how you respond. But, there is cause and effect, programmed also, it’s your choice. Live by your own rules, without a foundation and see how far that will take you. You’ll fail here on this planet and on your afterlife, including struggling against the program. It’s like being a rebellious kid against the parents. But learn to be free in the program and flow with it and it will reward you beyond belief. And that is what is going on in this program of the 5th cycle. Very serious, the last cycle to who is going to set on Christ’s throne with him as his royal elite. Even, though there are a total of 7 cycles, we are at the end of the 5th cycle. The molding of the Royal Priesthood.

So, who is behind the screen, controlling everything through mathematics as a language of nature and the human is part of nature.

You can find this out in **(Job 38: 31-33)**. Let’s look at that for a moment.

Magi Astrology is the practice of observing the skies and reading what God has written there, as we were so commanded by Yahusha of Nazareth, whom we believe to be the Christ, the Son of God, and the Messiah of this world. And there will be signs in the sun and in the moon and in the stars, **(Luke 21:25) Do you know what they are? Come and see me if you want to know.**

The end purpose of our study, and our life work, is to become more Christ like; to cultivate those traits and characteristics which are most like Him and to weed out those which do not reflect His divine nature, thus making ourselves a welcome place for Him to dwell.

We know that it was God, **YHVH**, who conceived, composed, and instituted the zodiac and the laws of the science of astrology. In **(Genesis 1:14)**, we find God saying, 'Let there be lights in the expanse of the sky, and let them serve as signs. And so it was.'

Isaiah 19:19 In that day shall there be an altar to the **LORD** in the midst of the land of Egypt, and a pillar at the border thereof to the LORD. **(The Great Pyramids of Egypt is Designed as the Central Clock connected to heaven in the universe. It holds all knowledge of language in Mathematics) Connected above in exact some pattern has on Earth, this clock pattern is directly above the Great Pyramids of Egypt, with the belt of Orion. Amazing!!!**

(Job 38: 31-32)

“Can you bind the cluster of the Pleiades or loose the belt of Orion; the belt of Orion is the twelve constellations with the belt buckle, between Taurus and Gemini and they are fix, they have not moved in a million of years. Can you bring out **Mazzaroth (Greek word for Zodiac or Constellations)** in its seasons? **Do you know the ordinances of the heavens? Can you set their dominion over the earth?** **God** later emphasized this in a discussion with **(Job, chapter 38 verse 32)** where He says, 'Can you bring forth the Mazzaroth, (the zodiac or constellations), in their seasons or lead out Ursa Major with its cubs, Ursa Minor?' In stating it thus, God is clearly claiming both ownership and oversight of the heavens, including Earth.

(Psalm 19:1-3), "The heavens declare the glory of God. The skies proclaim the work of his hands. Day after day they pour forth speech. Night after night they display knowledge. There is no speech or language where their voice is not heard."

In **(Psalm 19)** we read how the heavens declare the glory of God and display His handiwork.

Astrology's point of view is based on what appears to be happening in the Heavens, looking out from our position on Planet Earth. It seems to us that the sky and everything in it is moving around the Earth in a never-ending dance of cycles and patterns every 26,000 years for one rotation through the ages. The yearly cycle goes through all signs of the constellations every year. Astrology believes that these celestial cycles and patterns manifest themselves in individual life forms, in order to experience physical existence. This is God's language of physics. People are a combination of the signs, to make them individual. No one has the same spiritual DNA.

The Zodiac Band is based on the star groups along the path of Earth's orbit around the Sun

While it appears from our viewpoint on Earth that the Sun moves in a 360° circle around the sky, in reality it is the Earth that is taking around 360 days to complete one full orbit of the Sun. The Zodiac Band is a very stylized version of the section of the sky along which the Sun appears to travel, known as the Ecliptic. It has been divided into 12 equal sections of 30° degrees each. The 12 sections have been allocated to twelve of the star groups (or constellations) that fall across the path of the Ecliptic. Twelve sections of 30° degrees each

add up to the 360° circle that represents what appears to us to be the Sun's journey across the Heavens above Earth. And is known as the central clock to the universe.

The 12 sections from 0° to 360° of the Zodiac Band or Ecliptic have been named for the constellations, as follows:

- 0° to 30° of the Zodiac Band is allocated to **Aries**
- 30° to 60° of the Zodiac Band is allocated to **Taurus**
- 60° to 90° of the Zodiac Band is allocated to **Gemini**
- 90° to 120° of the Zodiac Band is allocated to **Cancer**
- 120° to 150° of the Zodiac Band is allocated to **Leo**
- 150° to 180° of the Zodiac Band is allocated to **Virgo**
- 180° to 210° of the Zodiac Band is allocated to **Libra**
- 210° to 240° of the Zodiac Band is allocated to **Scorpio**
- 240° to 270° of the Zodiac Band is allocated to **Sagittarius**
- 270° to 310° of the Zodiac Band is allocated to **Capricorn**
- 310° to 330° of the Zodiac Band is allocated to **Aquarius**
- 330° to 360° of the Zodiac Band is allocated to **Pisces**

The 12 Zodiac Star Groups, or Signs, have their own well-defined characteristics. Although we can trace meanings of the Zodiac Signs back to Egyptian times and beyond clear to the tree of life, no one knows their true origins, many of which are probably pre-historic. The first reported practice was in Ancient Spiritual Hebrew of the Torah in Ancient Babylon, and all of your prophets and Magi's of the Bible were Esoteric Spiritual Astrologers or the Eternal Order of the Magi's, of the Old Testament.

Astronomy and Astrology was only divided in the last 60 years, before that they were one in the same for thousands of years. Why, was this done? It wasn't due to the lack of evidence of scientific knowledge; it was due to the fact that it proved there was Master Mind of Great Intelligence behind it of a pre-designed program. (God!) Science and governments don't want to lead with any kind of spiritual faith. But there is factual science of physics behind astrology. The ruling governments and leaders don't want you to have this knowledge, so you cannot have control of your own mind and to know what is going on a daily bases to guide your life. It's a guide to balance, brings peace into your life. By choosing the right partners, to career, and right timing to responses. And in doing so, you won't become a victim of circumstances of out of your control. Instead they the government wants to control you under Satan controls, which have been going on for thousands of years. Also, they don't want you to know, that there is a God and Christ and they are in control. All knowledge is God's knowledge!

Astronomy is the scientific side of our attempt to understand the workings of the skies above our home planet. Astronomy explains how the Sun, Moon, Planets and Constellations move, what they are made of, the distances of time and space between them. The goal of astronomy is to make real time observations, take material measurements and draw logical conclusions.

The Zodiac is not a logical concept; it is part of a symbolic language that has been used through the Ages to help us interpret Life's mysteries. It is all physics in mathematic of spirituality, a program designed by god, with interpretations with each sign and the 12 houses that they rule in our birth chart, which is the map we have brought along to guide us on our journey.

Dr. Clarice is not only an Esoteric Spiritual Astrologer, but also a Mystic, what is a Mystic. A Mystic is an empathic being that carries all of the Ancient Spiritual Knowledge of the Universe and its functions since birth. And is from the House of Levi and the Secret Eternal Order of The Magi's.

ATTENTION, look for my future seminars dates on Understanding the Different Levels of the Simulated Matrix that you live in. Do you live in a Simulated Matrix? Yes! Do you have free will, yes!

But that is programmed too by cause and effect! Even our 3rd dimension is a Simulated Matrix, of positive and negative energy forces! Most of the population; around the world have been rebellious to this Matrix's from birth! Learn how to operate in this Matrix. Learn what is the Matrix and where did it come from, including how to improve your life through the positive side of the Matrix, and that is called getting on to the Light Bridge!

Interesting Message from Dr. Clarice on being a Metaphysician Practitioner. Msc. Degree. What does this mean? "The meaning is Master Science of what is beyond the physical. "Metaphysical Science" simply means "knowledge" of the universe and mans existence.

The Esoteric Science of Magi Spirituality Covers: systematically describes the mechanisms behind a diverse range of subject matter including: esotericism, astrology, numerology, consciousness, sleep and dreams, reincarnation, religion, creation, spirituality, evolution, space and time, higher dimensions, heaven and hell, ghosts, angels and demons, out of body experiences, near death experiences, mystics that carry the ancient knowledge, clairvoyance, psychic abilities, personal development, life coach, counsel or meditation and the meaning of life. Are here to help, but only the ones you can learn are those practitioners that believe in God and Christ.

The common denominator of these and all subjects, of course, deals with an exploration of reality, and in the idealistic sense, how such knowledge may benefit human life on this earth, both individually and collectively? If then, this is the aim of such interest; it is why most professional metaphysical practitioners regard metaphysics as a spiritual philosophy or a way of life. All but a very few practitioners in Metaphysic today have a pivotal point of some sort of spiritual philosophy in whatever system or teaching of metaphysics you are engaged in. It is important to understand this, especially when reviewing the legal technicalities of being in metaphysics professionally. Those who not believe are the new agers who want to believe they are in control of their own lives. Theirs is the new philosophy they live by their own rules. But they don't realize Satan has been in their ears and mind. And the New Ager are being lead down the wrong path in life.

It is not the position of the universities or its parent body, the international Metaphysical Ministry, to take one phase of study over another, as it is the beliefs of the universities that there are many paths in the esoteric knowledge that humans may travel on their way to finding truth. There is an old proverb of philosophy, which states, "No matter what path a human may travel, it is My Path, no matter where they walk, it leads to me. This is why God said you have free will to believe in what you feel but through the heart will guide you. But, this is a problem, people are not that wise to guide their own lives, this is why God created the Zodiac in the first place, was to help guide you with the planets, and teach you things. But, like Lucifer he wanted to live by his own rules, not Gods. Satan means (opposer). People who want to live by their own rules are opposer's to God and you. An Anti-Christ. And they will fall as Satan will; philosophies are just that, philosophies, with no foundation of strength just words. So, it won't last a long time, nor hold you up. And no eternity!

In a more absolute sense, we like to think of metaphysics as dealing with the basic questions of life, such as the relationship of man, mind, and the universe, which leads to answers to the age-old questions of anyone who has truly paused to reflect on life by asking the most fundamental questions of all - "who am I, what am I, where have I been, and where am I going, what is the purpose, now and in the end of life. God said he created everything, and all knowledge. So any

knowledge that takes God out of the equation is considered false teachings. "Physics and Science without Spirituality is lame, Spirituality without Physics and Science is blind." I just wanted to say, and bring to your mind; God never changes his words or mind. So, in the New Testament going against astrology was the Roman Empire, with the one religion, the Catholic who wanted to control the people, trying to create the One World Order, like I said history repeats itself and will again, it's programmed that way. Everything in the third dimension is programmed either positive or negative and sometimes both. Everything you lay your eyes on has either energy force or both. Like day and night, love and hate. You know the rest!!!!!!!
